

## The #1 Visitor Management Solution for Facility Security and Compliance

As a manufacturer, security, employee safety, and regulatory demands are your top visitor management concerns. LobbyGuard® builds visitor management solutions that ensure workplace safety, minimize front-desk workload, and help you maintain full ITAR, FSMA and CTPAT compliance.

LobbyGuard helps ensure ITAR compliance by:

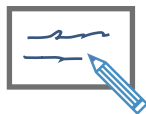

- Checking visitors for U.S. person status
- Performing instant visitor background checks using the U.S. Consolidated Screening List (CSL)
- Screening visitors against your facilities' custom watch lists (Red Flag and Green Flag)
- Notifying your host employee via email or text when a visitor arrives
- Printing a contrasting-color badge for Non-U.S. person requiring constant escort

- Safeguard your facilities, intellectual property, inventory, and corporate assets
- Keep employees safe
- Maintain ITAR, FSMA, or C-TPAT compliance
- Project an image of professional and technical excellence
- Improve front-desk productivity

LobbyGuard solutions are user-friendly, scalable, and integrate seamlessly with your existing network. Our systems help you:

Modernize your lobby or front desk and project the best company image to every visitor

Dispense with multiple document checks, handwritten badges, and employee look-ups to notify hosts

Know precisely who is on the premises in real time across your locations and remain in strict regulatory compliance

Track visitor arrival, exit, and employee host; instantly create an accessible record of visitor movements across the enterprise

LobbyGuard offers industry-leading remote and *on-site technical support, a standard one-year warranty or optional three-year warranty, and custom development and integration services* for manufacturers needing additional hardware or software features.

**LobbyGuard Versa™** is an affordable visitor kiosk system that easily adapts to any facility entrance or front office environment. LobbyGuard Versa is a Microsoft® Windows-based tablet kiosk featuring all the security, reporting, and compliance benefits of pre-installed, industry-leading LobbyGuard® visitor management software. (Includes ID/barcode scanner, integrated camera, and badge printer)

**LobbyGuard Defender™** is an all-in-one kiosk system featuring a 22" touchscreen and flexible mounting options to fit any client facility. LobbyGuard Defender includes everything manufacturers need for high-traffic self-service visitor sign-in, sign-out, and monitoring. Powered by pre-installed LobbyGuard software, LobbyGuard Defender represents the ultimate in robust visitor management kiosk solutions. (Includes ID/barcode scanner, integrated camera, and badge printer)
